HEARKEN YE!

To the Voice of Honolulu People

If you will but listen to your friends and neighbors they will tell you how the pains and aches of a bad back, the annoyances of urinary troubles, the nervousness, the restlessness which come from kidney ills can be relieved and cured. Read what one Honolulu citizen says:

Writing under date of January 10th, 1899 Jurgen Walter of this city tells us as follows: "My age is 73—well past the ordinary span of life—and I am the parent of eight children. Being so far advanced in years, I regard the relief obtained from Doan's Backache Kidney Pills.

I suffered from a lame back for years, but after taking some of the pills (procured at Hollister's drug store) was greatly benefited, and I am satisfied the pills did me much good."

Our kidneys filter our blood. They work night and day. When healthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptoms—pain in the back, headache, nervousness, hot, dry skin, rheumatism, gout, gravel, disorder, eyesight and hearing, dizziness, irregular heart, debility, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

Doan's Backache Kidney Pills are sold by all chemists and storekeepers at 50 cents per box, or will be mailed on receipt of price by the Hollister Drug Co., wholesale agents for the Hawaiian Islands.

Palolo Fire Aftermath.

The Palolo Heights fire drew the attention of Forester Hosmer to the section yesterday, and an examination was made as to the area burned over. Mr. Hosmer found that the fire had burned to the edge of the forest reservation and only a few trees were damaged. Luckily the fire had burned itself out when the forest was reached.

A. F. Cooke of the Palolo subdivision called on High Sheriff Brown to ascertain whether any charges were to be preferred. The High Sheriff said the matter was merely under investigation. Mr. Cooke states the damage is not so great as has been stated to the Acting Governor and other officials.

NO POLITICS IN IT MR. ATKINSON SAYS

Acting Governor Atkinson stated emphatically yesterday that there was no politics in the stand he had taken for citizen labor upon Government works. "It is because I believe that it is nothing but right that the citizens, who pay taxes and otherwise uphold our form of government, should have the benefit of whatever work is going which has to be paid for out of the public treasury.

"There are plenty of citizens right in Honolulu who would go over to Hamakua for work on new roads if offered fit wages. If citizen labor cannot be obtained on contracts let on that basis, then the Government should have the full benefit of the difference between properly paid citizen labor and cheap Asiatic labor."

ONLY THREE DAYS TO SAVE TROUBLE

Saturday will be the last day for receiving Income Tax returns at the Tax office. Section 8 of the law contains this stringent provision.

"When any person or corporation having a taxable income refuses or neglects to render any return or list required by law or declines to take oath or affirmation thereto, the assessor may make such assessments as he may consider just and the same shall be binding and conclusive upon all parties and shall not be subject to appeal. In case of any false or fraudulent return or valuation by any taxpayer the assessor shall add 200 per cent. to the just valuation of the income of such taxpayer and the amount of the tax assessed on such increase shall become part of the tax on the said income."

It is proposed to have dancing on the lodge-room and roof-garden floors and a supper will be served.

Got a Big Shark.

Young Brothes got a big shark at the harbor mouth last night at about five o'clock. The fish weighed about 300 pounds and measured twelve feet from tip to tip. He put up a stiff fight for his life but at last succumbed and was hauled in.

GRIP CONVALESCENCE

There's nothing better than Scott's Emulsion after the grip. When the fever is gone the body is left weak and exhausted; the nervous system is completely run down and vitality is low.

Two things to do: give strength to the whole body and new force to the nerves. Scott's Emulsion will do it; contains just what the worn-out system needs.

Rich blood, healthy flesh, resistive force, more and better nourishment are what Scott's Emulsion supplies to the convalescent.

Scott's Emulsion is the original and has been the standard emulsion of cod liver oil for nearly thirty years. Why buy the new, untried, cheap emulsions or so called wines, cordials and extracts of cod liver oil, when you can buy what is sure to help you?

We'll send you a sample free upon request. SCOTT & BOWNE, 409 Pearl Street, New York.

MOSQUITOES UNDER BAN

People Fined For Having Them Around.

WASHINGTON, July 7.—By concerted action on the part of all the families living in any given town, it is possible without much trouble to rid that town of mosquitoes. That has been established by the surgeons of the Marine Hospital Service.

According to them if you are troubled by mosquitoes in or around your home it is your own fault—or your neighbor's. There are simple ways of getting rid of the little pests.

The people of Laredo, Tex., are working on this theory and it costs a citizen of that border town a fine of from \$5 to \$20 every time young mosquitoes are found about his premises. The people of Laredo are afraid of yellow fever, and with reason.

It is pretty well established that the germs of yellow jack are carried by mosquitoes. Mosquitoes are bad enough, but yellow fever is worse, and the health authorities in this little Texas town believe that both can be avoided by enforcing certain simple laws of sanitation. And if Laredo can accomplish this why not New Orleans, and if New Orleans, why not New York?

They are fighting mosquitoes all along the border between Texas and Mexico, and the prospect is that the troublesome insects will find the climate of that part of the country exceedingly unhealthy this year. The people of Laredo, for instance, have learned that a swamp or a marsh is not necessary to the propagation of mosquitoes, but that the insects are hatched in a thousand and one places not ordinarily thought of.

If your next door neighbor throws a tin can into the back yard, and rain water accumulates in the can and remains there for even a few hours, the result is likely to be a small swarm of mosquitoes on your premises within a surprisingly short time. Cisterns and barrels of water, pools or rain-water standing in gutters or in flower pots are favorite places for mosquitoes to breed. The obvious advice is, Get rid of the water or cover it with a screen.

The difficulty is, of course, that it is impossible to secure concerted action to fight mosquitoes according to this method, except under stress of great public danger. In Laredo there would be no crusade against mosquitoes, were it not for the fact that the health authorities and the people generally are convinced that the insects transmit the germs of yellow fever.

The City Council of Laredo has enacted some stringent ordinances on the subject of mosquitoes, and the surgeon of the Marine Hospital Service stationed there has issued a mosquito circular, and the town is placarded with signs like this:

You Are Responsible
For the Mosquitoes

In Your Houses and Dooryards.

The circular issued by Marine Hospital Surgeon Richardson gives rules for mosquito destruction, as follows:

First—Mosquitoes breed only in water, usually fresh, standing water in artificial places.

Second—Mosquitoes occur in the vicinity in which they breed. Invasions from a long distance are exceptional.

Third—The young mosquito or "wiggler" lives in water at least seven or twelve days.

Fourth—Although the wigglers live in water, they must come frequently to the surface to breathe.

Fifth—Coal oil on the surface of water prevents the wigglers from breathing.

Sixth—Destroy the breeding places and you will destroy the mosquitoes.

Seventh—Empty the water from all tubs, buckets, cans, flower pots and vases once every forty-eight hours.

Eighth—Fill or drain all pools, ditches and various excavations, as post holes left unused, etc.

Ninth—Change regularly every day all water needed in chicken coops, kennels, etc.

Tenth—Treat with coal oil all standing water which cannot be screened or drained. One ounce of oil will cover fifteen square feet of surface. The oil does not affect the water for use if the water is drawn from below.

Eleventh—Put fine wire netting over cisterns, wells and tanks of water in everyday use.

Twelfth—Places in which it is undesirable to place oil, such as watering troughs for stock, ily ponds, etc., can be kept free from the wigglers by putting in gold fish. The nymphs of dragon flies and tadpoles of frogs also feed on the wigglers.

Thirteenth—Clean away all weeds, grass and bushes about ditches, ponds and other possible breeding places, since these afford a hiding place for the adult mosquitoes.

Fourteenth—Clean up vacant lots and back yards of all cans, tins, bottles and rubbish.

Fifteenth—First do away with or treat all places where mosquitoes are known to breed, and then begin work on places where they might breed.

Sixteenth—As a citizen of your community you should feel a personal responsibility for the destruction of the mosquitoes in your district and seek to co-operate with your neighbors in the work of doing away with breeding places. Inspect and treat with coal oil gutters, culverts, ditches, manholes.

catching basins, etc., along the roadside. Manhole covers should be screened.

Seventeenth—Where oil is applied to standing water it must be distributed evenly over the surface.

Eighteenth—Houses should be cleared of all winged mosquitoes by the burning of insect powder or sulphur. The mosquitoes will fall to the floor and should be collected and burned.

Nineteenth—Relief in any community or district depends entirely upon the co-operation of the members of the community.

It has been declared by the City Council of Laredo that all wells, cisterns, tanks, reservoirs and other water containers which are not either coated with oil or protected by screens are public nuisances, and the persons on whose premises they are found are liable to a fine in the police court.

Moreover, the law is being enforced. The result is that mosquitoes are practically unknown in that town. The same is true in several other Texas towns along the border.

BUILDERS AND TRADERS WILL MEET TONIGHT

WHO GETS CONVENTION?

Hilo Making a Strong Bid for the Plum.

The question of whether Hilo or Honolulu will get the Republican Territorial convention will be decided at a meeting of the Territorial Central Committee which has been called by Chairman Crabbe to meet at headquarters on Monday evening.

It is rumored that Hilo has more than a fighting chance for getting this year's convention, having made a strong bid for it. Once before Hilo tried to get the plum but failed. This time, however, it appears as if the wind was blowing in the direction of the Rainy City.

Representative E. Knudsen of Kauai is said to be in training for a Senatorship from the Garden Island.

Senator Cecil Brown, whose term of office expires before the coming election, is said to again be out in the field for re-election.

One of the efforts of the so-called "Good Government Club," formed by Paddy Ryan, is said to be to boost E. H. F. Wolters, father-in-law of Ryan, to the Legislature. Another man who is said to have the legislative bee buzzing in his bonnet is Singer, the baker, although no one is standing sponsor for him.

QUEEN'S ENGLISH WELL DISGUISED

A sample of wonderfully-constructed English as "she" wrote" by an unlettered Japanese was received the other day from a yard-boy by a citizen. The latter had been rolled into the morning's Advertiser after it had been thrown into the yard by the paper carrier. The writer was evidently seeking for work and had been an applicant at the same place on other occasions. The letter is as follows:
